“Parent to Parent” is a nationally acclaimed video-based parenting program. This workshop is free and offers a proactive and positive approach to parenting. It provides an opportunity for parents to examine and explore the challenges faced in raising children in today’s culture and introduces and highlights approaches that work and pitfalls to avoid.

Topics include:

- on-line social networking
- the power of the media
- cultural traps
- character development during teen years
- drug and alcohol use
- violent behavior
- effective family communication and involvement
- guidance for helping children achieve their potential

The four video based classes are parent facilitated and run for two hours. Each class involves: viewing a video presentation delivered by Bill Oliver of the Passage Group ([www.thepassagegroup.com](http://www.thepassagegroup.com)); receiving critical related information; and engaging in group discussion. This presentation has been highly regarded by parents, many who return with new and different concerns.
